***Allowable Subject Matter***

Claims 1-2, 4-15 are allowed.

The following is an examiner's statement of reasons for allowance:

The catalyst component requires a dialkoxy magnesium, titanium tetrachloride, phthalic acid diester or derivative thereof and either (d<sup>1</sup>) or (d<sup>2</sup>). The Declaration distinguishes applicants method and product by comparing with those of the prior art. Applicants demonstration that the polypropylene obtained has a higher melt index therefore would be distinguishable over prior art and therefore be novel.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
